

LT-43 Ester Lithium Grease 8031

Multipurpose automotive grease for general use, made on the basis of highly refined mineral oils with a thickener based on lithium soap with the addition of synthetic esters and a functional additive package. Has consistency class NLGI 3.

Properties:

- The presence of synthetic esters in the composition significantly increases the anti-wear, anti-scuffing and anti-friction properties of the grease;
- Maintains its operational properties from -30 °C up to +130 °C, which increases the service life of bearings;
- Has excellent water resistance;
- Reliably protects against corrosion when the equipment operates in a contaminated environment for a long period of operation;
- Possesses excellent mechanical and oxidation stability;
- Grease consistency remains constant during long-term storage. Shelf life: 5 years from date of production.

Application:

- High speed plain and rolling bearings (ball and roller) of all types of equipment, machinery and mechanisms;
- Bearings of electric engines and electric generators, pumps, etc.;
- Closed bearing units with lifetime lubrication;
- Designed for use in all types of mobile machinery as well as for general industrial applications.

Observe the manufacturer's instructions in the operating manual of the equipment!
